

Metric equivalence as an almost similarity property

Sammy Musundi, Eric Gitonga and Benard Nzimbi

**Department of Physical Sciences, Chuka University, School of Mathematics, College of
Biological and
Physical Sciences University of room, Nairobi, Kenya.**

Various results that relate to almost similarity and other classes of operators such as isometry, normal, unitary and compact operators have been extensively discussed. In this paper, we describe the spectral picture of almost similar operators. To be more specific we will describe the spectrum, the spectral radius, the numerical radius as well as the norm of almost similar operators.

Keywords: Almost similarity; Self-adjoint; similar operators.
