

The Positive $P_{0,1}$ -matrix completion for digraphs of order three

Victor Tomno
Moi University, Kenya.

A positive $P_{0,1}$ -matrix is a matrix in which every principal minor of matrix is nonnegative and all entries are positive. In this paper, it is shown that all digraphs of order three that include diagonal entries have positive Ha-matrix completion.

Keywords: Poi-matrix; positive P_m -matrix; positive P_m -completion; digraphs.
